HOW TO USE THIS INDEX: Feature material has been indexed two or more times — under one or more of the subject categories or railroads and under the author’s last name. Photographs standing alone are indexed (usually by railroad), but photographs within a feature article are not separately indexed. Brief news items are indexed under the appropriate railroad and/or category; news stories are indexed under the appropriate railroad and/or category and under the author’s last name. Most references to people are indexed under the company with which they are easily identified; if there is no easy identification, they may be indexed under the person’s last name (for deaths, see “Obituaries”). “Maps of the Month,” and product reviews are indexed under these categories. Railroad historical societies and museums are indexed by individual name. Items from countries other than the U.S. and Canada are indexed under the appropriate country.
A
