INDEX TO VOLUME 51

NOVEMBER 1990 THROUGH DECEMBER 1991—1540 PAGES

HOW TO USE THIS INDEX: Most feature material has been indexed three or more times—once by the title under which it was published, again under the author's last name, and finally under one or more of the subject categories or railroads. Photographs standing alone, as in the "Railroad News Photos," "Photo Section," or departments, are indexed (usually under the railroad), but photographs within a single-subject feature are not usually separately indexed. News items are indexed under the railroad and/or category. Most references to people, or quotes by them, are indexed under the railroad or company with which they are easily identified; if there is no such easy identification, they may be indexed under the person's last name. Maps, radio frequencies, rosters of locomotives and equipment, and book and video reviews are indexed only under those categories (unless otherwise indicated, "rosters" are of diesel locomotives). Items from foreign countries (other than the United States and Canada) are indexed under the country. Numerals are indexed in alphabetical order as if spelled out; "article" words (a, an, the) are omitted when alphabetizing an index. Please note that beginning with this index, TRAINS' volume numbers will correspond to a calendar year, instead of the November-October volume year used previously. Thus, this index includes 14 issues, November 1990 through December 1991.
American Locomotive Company: Big Three of Stages, Sep 18
OSDR demonstrator at DP’s Taylor Yard (photo), Nov 19, 138
Str plant switcher at Schenectady, N.Y. (photo), Feb 15
Timelines, Nov 19, 108
